

# AKKotune

## compact 5.1 all-in-one

### The new tuning table with integrated Chromatic Tuner

Now you can start tuning right away - the pitch is measured directly with the built-in tuner, which consists of a system similar to that used for tuning orchestral instruments.

**As before:** Setting the air pressure, switching the wind direction, displaying the air pressure, remote start with optional foot switch and temporary stop.

**New:** Integrated pitch display, output of reference tones, USB output for the integrated microphones, microphone sensitivity setting, air pressure setting via optional foot pedal.
